Tasmania	3	2%	2%	0%
NSW & ACT	45	30%	33%	-3%
South Australia	4	3%	7%	-4%

KEY LEARNINGS

The biggest impediment to the planting of more churches is the lack of potential church planters.

Denominations that are planting the most churches generally have someone whose major responsibility is to drive church planting within their denomination or region.

Multiplication Ministries that help assess, equip and coach church planters are underutilised by some denominations.

EX Exponential Australia is committed to providing thought leadership that stimulates positive change towards embracing multiplication, inspiring leaders to action and fostering engagement with multiplication ministries who will serve the church well.
